APPLICATION FOR PATENT TERM EXTENSION UNDER 35 U.S.C. § 156

Mail Stop: Patent Term Extension
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450.

RE: Application for Patent Term Extension Pursuant to 35 U.S.C. § 156 (37 C.F.R. § 1.740) United States Patent Number 5,879,382

Dear Commissioner:

Enclosed is an application for patent term extension pursuant to 37 C.F.R. § 1.740. The owner of record, Medtronic Vascular is submitting this application. Medtronic Vascular (formally Medtronic AVE) acquired the entire assets of Applied Vascular Engineering (aka Arterial Vascular Engineering, aka AVE) through corporate acquisition on January 29, 1999. Thus all rights in United States Patent Number (USPN) 5,879,382 are held by and vested in Medtronic Vascular a Delaware Corporation and a wholly owned subsidiary of Medtronic, Inc., a Delaware company. Medtronic Vascular's corporate headquarters are located at 3576 Unocal Place, Santa Rosa, CA 95403. A brief chain of title summary follows.

Michael D. Boneau is the sole inventor of USPN 5,879,382 which is a continuation of United States Patent Application Serial Number (USPASN) 08/619,014, filed Mar. 20, 1996, now USPN 5,674,278, which is a continuation of USPASN 08/471,738, filed Jun. 6, 1995, now USPN 5,891,190, which is a division of USPASN. 08/172,420, filed Dec. 22, 1993, now abandoned, which is a division of USPASN 07/398,180, filed Aug. 24, 1989, now USPN 5,292,331. Boneau assigned

#15

5879382

1120.00 DA

his entire right, title and interest in USPASN 07/398,180 together with all divisional applications, continuations and continuations-in-part to Accutrix, Inc. its successors, legal representatives and assigns on August 24, 1989. The assignment was recorded in the United States Patent and Trademark Office (USPTO) on August 24, 1989. A complete microfilm copy is available in the USPTO records on reel 5116, frame 0570.

Subsequently, Accutrix, Inc. assigned their entire right, title and interest to USPASN 07/398,180 together with all divisional applications, continuations and continuations-in-part to Endovascular Support Systems, Inc. on August 9, 1991. A complete microfilm copy is available in the USPTO records on reel 5816, frame 0215.

Thereafter, Endovascular Support Systems, Inc. assigned their entire right, title and interest to USPASN 07/398,180 together with all divisional applications, continuations and continuations-in-part to Applied Vascular Engineering, Inc. September 8, 1993. This assignment was recorded in the USPTO on September 8, 1993. A complete microfilm copy is available in the USPTO records on reel 6687, frame 0449.

On January 30th, 1996 Applied Vascular Engineering, Inc. changed its name to Arterial Vascular Engineering, Inc. Applied Vascular Engineering then assigned its entire right, title and interest to USPASN 07/398,180 together with all divisional applications, continuations and continuations-in-part to Arterial Vascular Engineering. This assignment was executed January 30th, 1996 and was recorded March 20, 1996. A complete microfilm copy is available in the USPTO records on reel 8522, frame 0049.

Medtronic, Inc. acquired the assets of Arterial Vascular Engineering (AVE) through acquisition on January 29th, 1999 and formed a new Delaware Corporation named Medtronic AVE. Arterial Vascular Engineering assigned its entire right, title and interest to USPASN 07/398,180 together with all divisional applications, continuations and continuations-in-part to Medtronic AVE. This assignment was executed January 28th, 1999 and was recorded January 31, 1999. A complete microfilm copy is available in the USPTO records on reel 011258, frame 0053.

Subsequently, Medtronic AVE changed its name to Medtronic Vascular, the present applicant, wherein all right, title and interest to USPASN 07/398,180 together with all divisional applications, continuations and continuations-in-part now reside. Therefore, the application for patent term extension, Medtronic Vascular, is the owner of all rights title and interests in USPN 5,879,382, the subject patent of the present patent term extension application.

Documents supporting the above title chain for USPN 5,879,382 can be found in Appendix A of this application for patent term extension.

- 1) Complete Identification of the Approved Product by appropriate chemical and generic name, physical structure or characteristics:

The approved product is an over-the-wire coronary stent system for use in patients with symptomatic ischemic heart disease due to discrete single de novo and restenotic lesions. The FDA product code is MAF for Stents, Coronary. The Medtronic Vascular stent marketed as the "S8 Over-the-Wire System" or alternatively under the trademarked name "Driver Stent Delivery System." The System includes a cobalt-based modular stent mounted on a balloon catheter as depicted in Figure 1 below¹. Figure 2 shows the distal portion of the Medtronic Driver Stent Delivery System in detail. Figure 3 depicts a S8 modular stent member.

Figure 1

Figure 2

Figure 3

- 2) A complete identification of the Federal statute including the applicable provision of law under which the regulatory review occurred:

The Federal Statute under which regulatory review took place for the Medtronic Vascular's S8 Over-the-Wire System is 37 C.F.R. §814.

- 3) The date on which the product received permission for commercial marketing or use under the provision of law which the applicable regulatory review period occurred.

The Medtronic Vascular S8 Over-the-Wire System was approved for marketing October 1, 2003.

- 4) Statement that the present application is being submitted within the sixty day period permitted for submission and an identification of the date of the last day on which the application could be submitted.

¹ See http://www.medtronic.com/medtronic_vascular/cs_drivermx.html

The present application for patent term extension is being submitted with the sixty day period permitted for submission pursuant to 37 C.F.R. §1.720(f). The last day for submission of the present application is November 30, 2003. However, because November 30, 2003 is a Sunday, this application may be filed December 1, 2003.

- 5) The complete identification of the patent for which an extension is being sought by the name of the inventor, the patent number, the date of issue and the expiration date.

The present application for extension is for United States Patent Number 5,879,382 issued March 9, 1999 and expiring August 24, 2009. The inventor is Michael D. Boneau.

- 6) A copy of the entire patent for which extension is being sought, including the entire specification, claims and drawing.

A copy of U.S. patent number 5,879,382 is attached as Appendix B.

- 7) A copy of any disclaimer, certificate of correction, receipt of maintenance fee payment, or reexamination certificate issued in the patent.

There are no disclaimers, certificates of correction or reexamination certificates issued on U.S. patent number 5,879,382. A copy of the maintenance fee payment record is provided as Appendix C.

- 8) Statement that the patent claims the approved product, or a method of using or manufacturing the approved product, and a showing which lists each applicable patent claim and demonstrates the manner in which at least one such patent claims reads on the approved product.

United States patent number 5,879,382 claims the S8 Over-the-Wire Coronary Stent System approved October 1, 2003. The applicant also asserts that claims 1, 2 and 4 of the '382 patent read on the Medtronic Vascular S8 Over-the-Wire Coronary Stent.

In particular, claim 1 reads on the approved device as follows:

**Claim Chart Comparing Claim 1 of U.S. Patent 5,879,382 element-by-element with the
S8 Over-the-Wire Coronary Stent**

Claim 1 of U.S. Patent 5,879,382	Corresponding Features of the S8 Over-the-Wire Coronary Stent System
1 An endovascular support device for implantation in a vessel within the human body comprising:	The S8 is a coronary stent is an endovascular device and is approved for use in treating vascular occlusions including de novo and restenotic lesions of the coronary artery. Thus the S8 Over-the-Wire Coronary Stent System is intended for implantation in a vessel within the human body.
a plurality of stent members	The S8 coronary stent is composed of a plurality of stent members as depicted in Figures 1 and 2 of the present application. Individual stent members as used in reference to the '382 patent are depicted in Figure 3 of the present application and Figure 1 of the '382 patent.
each stent member formed of a plurality of substantially straight segments having ends,	See Figure 3 of this application below compared to Figure 1 of the 5,879,382 patent. It can be seen that the S8 stent member in Figure 3 of this application comprises a plurality of substantially straight segments, each having ends. The corresponding structures are seen in Figure 1 of the '382 patent at number 16 (the substantially straight segment) and at number 12 and 14 (the ends).
the ends of respective pairs of the plurality of substantially straight segments connected end to end at a plurality of axial turns; and	See Figure 3 of this application below compared to Figure 1 of the 5,879,382 patent. It can be seen that the S8 stent member segments in Figure 3 of this application are connected end to end at a plurality of axial turns. The corresponding structures are seen in Figure 1 of the '382 patent at numbers 12 and 14.
whereby each of the plurality of stent members are capable of retaining a compressed configuration while mounted onto an outer surface of a catheter for delivery to an affected area of a vessel until application of a radial force to form an expanded configuration.	The S8 stent is designed to be compressed onto a catheter for delivery to an affected area of the vessel. Figure 4 of this application depicts a compressed S8 stent on a balloon catheter (Below). Figure 1 of this application depicts the S8 in the expanded state.
and then forcibly expanded to maintain the affected area of a vessel at a diameter larger than if the support device were not implanted	See Figure 1 of this application below. The expansion of the S8 results in a vessel diameter being greater than the vessel diameter. The pre-expanded vessel generally has an occlusion, or narrowing at the implantation site. Therefore, once the stent is expended, the vessel's diameter increases and is by necessity greater than the vessel prior to stent expansion and implantation.

The pictures and Figures that follow correlate to the claim elements discussed in the Claim Chart on the preceding page and clearly demonstrate that Claim 1 of U.S. patent 5,879,382 (the '382 patent) reads on the S8 Over-the-Wire Coronary Stent System.

Figure 1 of U.S. patent 5,879,382

Figure 2 of this application: A plurality of S8 stent members attached end-to-end.²

In Figure 1 of US Patent 5,879,382 the upper axial turns (12) are connected to the lower axial turns (14) by substantially straight segments 16. The corresponding structures are clearly evident in Figures 2 and 3 of this application and juxtaposed to Figure 1 of the '382 patent.

Figure 1 of this application showing the S8 stent balloon mounted and forcibly expanded.

² See http://www.medtronic.com/medtronic_vascular/cs_drivermx.html

Figure 3 (below) of this application depicts a plurality of S8 stent segments connected end to end at a plurality of axial turns.³

Figure 4 (below) of this application depicts the “Driver” (AKA S8Coronary stent) compressed onto catheter for delivery to an affected vessel.³

Therefore, based on the analysis above the Applicant respectfully asserts that Claim 1 of United States Patent number 5,879,382 reads on the approved device, the Medtronic Vascular S8 Over-the-Wire Coronary Stent.

Figure 2 of the '382 patent (below) shows the stent as claimed compressed onto a catheter balloon. Compare this with the Driver Stent (S8) compressed on a balloon catheter immediately above.

³ See http://www.medtronic.com/medtronic_vascular/cs_drivermx.html

New Page:

- 9) The relevant dates and information pursuant to 35 U.S.C. §156(g) to enable the Secretary of Health and Human Services to determine the applicable review period:
- A) The effective date of the investigational device exemption (IDE) and the IDE number:
- 1) Conditional approval of the Applicant's IDE was dated December 20, 2001 and signed by Dr. Bram Zuckerman, Acting Director, Division of Cardiovascular and Respiratory Diseases.
 - 2) The Applicant's IDE number is G010301, G010301/A1, A2 and A3.
- B) The date on which the application for product approval under Section 515 of the Federal Food Drug and Cosmetic Act was initially submitted and the number of the application.
- 1) A Pre-market Approval application (PMA) for the S8 Over-the-Wire Coronary Stent System was submitted April 9, 2003.
 - 2) The PMA number is P030009.
- C) The date on which the application was approved.
- The S8 Over-the-Wire Coronary Stent System PMA was approved on October 1, 2003.

New Page:

- 11) Statement that in the opinion of the applicant that the patent is eligible for extension and a statement as to the length of extension claimed, including how the extension was calculated.

The applicant respectfully asserts that United States Patent Number 5,879,382 is eligible for extension. The applicant has demonstrated that at least one claim of U.S. Patent 5,879,382 reads on the approved device (S8 Over-the-Wire Coronary Stent) and that this application for extension is being timely filed.

The applicant respectfully asserts that U.S. Patent 5,879,382 is eligible for a 413 day extension as calculated pursuant to 37 CFR §1.777.

Calculations Under 37 CFR §1.777

1. Calculations under 37 CFR §1.777 (c)(1)

Determine the number of days in the period beginning on the date a clinical investigation on humans involving the device began and ending the date the PMA was initially submitted.

- i) Clinical investigations on humans are deemed to have begun on the date that the FDA determines that an IDE required under section 520(g) of the FDCA (21 U.S.C. 360j (g) is substantially complete. In this case the records indicated that on December 20, 2001 the Medtronic Vascular IDE number G010301, G010301/A1, A2 and A3 received a Conditional Approval. Thus, this date will be used for the initial calculations .
- ii) The PMA was initially filed April 9, 2003.
- iii) The experimental period is thus calculated as the time between December 20, 2001 and April 9, 2003, or **476 days**.

2. Calculations under 37 CFR §1.777 (c)(2)

Determine the number of days in the period beginning on the date the PMA was initially filed and ending on the date the PMA was approved.

The PMA was initially submitted April 9, 2003 and was approved October 1, 2003. Thus the approval period was **175 days**.

The Sum of 37 CFR §1.777 c(1) and 37 CFR §1.777 (c)(2) equals 651 days.

3. Calculations under 37 CFR §1.777 (d)(1)

- i) Subtract the number of days in the periods (c)(1) and (c)2 of this section which were on and before the date the patent issued.

Zero for U.S. Patent 5,879,382.

- ii) Subtract the number of days in the periods (c)(1) and (c)2 of this section during which the applicant did not act with due diligence.

Zero for U.S. Patent 5,879,382.

- iii) Subtract one-half the number of days remaining in the period defined by (c)(1) of this section after that period is reduced in accordance with paragraphs (d)(1)(i) and (ii).

238 days for U.S. Patent 5,879,382.

Therefore, the maximum extension available for U.S. patent number 5,879,382 For U.S. is **476 (from step 1 (iii)) + 175 (from step 2) – 238 (from step 3 (iii)) = 413 days.**

4. Calculations Under 37 CFR §1.777 (d)(2)

Determine the number of days shortened by a terminal disclaimer.

Zero for U.S. Patent 5,879,382

5. Calculations Under 37 CFR §1.777 (d)(3)

Section (d)3 requires that 14 years be added to the date the PMA was approved, this equals the longest possible extension available (14 years from the approval date) in this case the 37 CFR §1.777 (d)(3) date is October 1, 2017).

6. Calculations Under 37 CFR §1.777 (d)(4)

The new expiration date is October 11, 2010 which is before October 1, 2017. Thus United States Patent 5,879,382 is eligible for the entire 413 day extension as calculated above.

7. Calculations Under 37 CFR §1.777 (d)(5)

United States Patent number 5,879,382 was filed after September 24, 1984.

- 12) Statement that the applicant acknowledges a duty to disclose to the Commissioner of Patents and trademarks and the Secretary of Health and Human Services any information which is material to the determination of entitlement to the extension sought.

The applicant acknowledges his duty to disclose to the Commissioner of Patents and trademarks and the Secretary of Health and Human Services any information which is material to the determination of entitlement to the extension sought. The applicant has no disclosures to that are material to the determination of entitlement to the extension sought.

- 13) The prescribed fee for receiving and acting upon the application for extension.

The Commissioner is hereby authorized to charge payment of the patent term extension application fee pursuant to 37 C.F.R. §1.20 (j)(1) in the amount of \$1,120.00 to Deposit Account number 01-2525.

- 14) The name address and telephone number of the person to whom inquires and correspondences relating to the application for patent term extension are to be directed.

Michael J. Jaro, Esq.
